Classification of the substance in accordance with Regulation (EC) No 1272/2008 The substance is classified as dangerous.

Flam. Liq. 1, H224 Acute Tox. 4, H302 STOT SE 3, H336 **Most serious adverse physico-chemical effects** Extremely flammable liquid and vapour. **Most serious adverse effects on human health and the environment** Harmful if swallowed. May cause drowsiness or dizziness.

	Supplemental info	rmation		
	EUH019	May form explosiv	e peroxides.	
	EUH066	Repeated exposure	e may cause skin dryness	or cracking.
	Other hazards			

The substance does not have endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605. Substance does not meet the criteria for PBT or vPvB in accordance with Annex XIII of Regulation (EC) No. 1907/2006 (REACH) as amended.

SECTION 3: Composition/information on ingredients

3.1. Substances

Chemical characterization

The substance specified below.

Identification numbers	Substance name	Content in % weight	Classification according to Regulation (EC) No 1272/2008	Note
	substance main component			
Index: 603-022-00-4 CAS: 60-29-7 EC: 200-467-2 Registration number: 01-2119535785-29- 0001	diethyl ether		Flam. Liq. 1, H224 Acute Tox. 4, H302 STOT SE 3, H336 EUH019 EUH066	1

Notes

1 A substance for which exposure limits are set.

Full text of all classifications and hazard statements is given in the section 16.

SAFETY DATA SHEET

according to Regulation (EC) No 1907/2006 (REACH) as amended

Diethyl ether					
Creation date	24th April 2016				
Revision date	04th January 2024	Version	6.0		

SECTION 4: First aid measures

4.1. Description of first aid measures

Take care of your own safety. If any health problems are manifested or if in doubt, inform a doctor and show him information from this safety data sheet. If unconscious, put the person in the stabilized (recovery) position on his side with his head slightly bent backwards and make sure that airways are free; never induce vomiting. If the person vomits by himself, make sure that the vomit is not inhaled. In life threatening conditions first of all provide resuscitation of the affected person and ensure medical assistance. Respiratory arrest - provide artificial respiration immediately. Cardiac arrest - provide indirect cardiac massage immediately.

If inhaled

Terminate the exposure immediately; move the affected person to fresh air. Protect the person against growing cold. Provide medical treatment if irritation, dyspnoea or other symptoms persist.

If on skin

Remove contaminated clothes. Wash the affected area with plenty of water, lukewarm if possible. Soap, soap solution or shampoo should be used if there is no skin injury. Provide medical treatment if skin irritation persists. Rinse skin with water or shower.

If in eyes

Rinse eyes immediately with a flow of running water, open the eyelids (also using force if needed); remove contact lenses immediately if worn by the affected person. Rinsing should continue at least for 10 minutes.

If swallowed

Rinse out the mouth with water and provide 2-5 dL of water. Provide medical treatment.

Most important symptoms and effects, both acute and delayed

If inhaled

4.2.

May cause drowsiness or dizziness.

If on skin Not expected. If in eyes Not expected. If swallowed

Irritation, nausea.

4.3. Indication of any immediate medical attention and special treatment needed Symptomatic treatment.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media

Alcohol-resistant foam, carbon dioxide, powder, water spray jet, water mist.

Unsuitable extinguishing media

Water - full jet.

5.2. Special hazards arising from the substance or mixture

In the event of fire, carbon monoxide, carbon dioxide and other toxic gases may arise. Inhalation of hazardous degradation (pyrolysis) products may cause serious health damage.

5.3. Advice for firefighters

Self-Contained Breathing Apparatus (SCBA) with a chemical protection suit only where personal (close) contact is likely. Use a self-contained breathing apparatus and full-body protective clothing. Closed containers with the product near the fire should be cooled with water. Do not allow run-off of contaminated fire extinguishing material to enter drains or surface and ground water.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Provide sufficient ventilation. The substance is flammable. Remove all ignition sources. Use personal protective equipment for work. Follow the instructions in the Sections 7 and 8. Do not inhale mist/vapours/spray. Prevent contact with skin and eyes.

SAFETY	DATA SHEET					
according to Regulation (EC) No 1907/2006 (REACH) as amended						
Diethyl ether						
Creation date 24th April 2016						
Revision date 04th January 2024 Version 6.0						
	according to Regulation (EC) Diet 24th April 2016	Diethyl ether	according to Regulation (EC) No 1907/2006 (REACH) as amended Diethyl ether 24th April 2016			

6.2. Environmental precautions

Prevent contamination of the soil and entering surface or ground water.

6.3. Methods and material for containment and cleaning up

Spilled product should be covered with suitable (non-flammable) absorbing material (sand, diatomaceous earth, earth and other suitable absorption materials); to be contained in well closed containers and removed as per the Section 13. In the event of leakage of the substantial amount of the product, inform fire brigade and other competent bodies. After removal of the product, wash the contaminated site with plenty of water. Do not use solvents.

6.4. Reference to other sections

See the Section 7, 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Prevent formation of gases and vapours in flammable or explosive concentrations and concentrations exceeding the occupational exposure limits. The product should be used only in the areas where it is not in contact with open fire and other ignition sources. Use non-sparking tools. Use of antistatic clothes and footwear is recommended. Do not inhale mist/vapours/spray. Prevent contact with skin and eyes. No smoking. Wash hands and exposed parts of the body thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Use personal protective equipment as per Section 8. Observe valid legal regulations on safety and health protection. Ground and bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Take action to prevent static discharges.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed containers in cold, dry and well ventilated areas designated for this purpose. Do not expose to sunlight. Store locked up. Keep container tightly closed. Keep cool. Recommended storage temperature max. 15 ° C. Storage class 3A - Flammable liquids (flash point below 55 °C)

The specific requirements or rules relating to the substance/mixture

Solvent vapours are heavier than air and accumulate especially near the floor where they may form an explosive mixture with the air.

7.3. Specific end use(s)

not available

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

European Union	Commission I	Directive 2000/39/EC
Substance name (component)	Туре	Value
	OEL 8 hours	308 mg/m ³
district sthere (CAC: $(0, 20, 7)$	OEL 8 hours	100 ppm
diethyl ether (CAS: 60-29-7)	OEL 15 minutes	616 mg/m ³
	OEL 15 minutes	200 ppm

8.2. Exposure controls

Follow the usual measures intended for health protection at work and especially for good ventilation. This can be achieved only by local suction or efficient general ventilation. If exposure limits cannot be observed in this mode, suitable protection of airways must be used. Do not eat, drink and smoke during work. Wash your hands thoroughly with water and soap after work and before breaks for a meal and rest.

Eye/face protection

Safety glasses or protective shield.

Skin protection

Hand protection: Protective gloves (Viton). When choosing appropriate thickness, material and permeability of the gloves, observe recommendations of their particular manufacturer. Suitable protective clothing and footwear - antistatic treatment. Contaminated skin should be washed thoroughly.

Observe usual measures for protection of the environment, see Section 6.2.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Physical state	liquid
Colour	colourless
Odour	sweet
Odour threshold	1 mg/m3 - 27 mg/m3
Melting point/freezing point	-117.6 °C
Boiling point or initial boiling point and boiling range	34.5 °C
Flammability	Extremely flammable liquid and vapour.
Lower and upper explosion limit	
bottom	1.9 %
upper	36 %
Flash point	-45 °C
Auto-ignition temperature	data not available
Decomposition temperature	data not available
рН	data not available
Kinematic viscosity	data not available
Solubility in water	data not available
Solubility in fats	data not available
Partition coefficient n-octanol/water (log value)	0.89
Vapour pressure	56.3 kPa at 20 °C
Density and/or relative density	
Density	0.71 g/cm ³
Relative density	data not available
Relative vapour density	data not available
Particle characteristics	data not available
Other information	
Evaporation rate	data not available

SECTION 10: Stability and reactivity

10.1. Reactivity The substance is extremely flammable. 10.2. Chemical stability The product is stable under normal conditions.

10.3. Possibility of hazardous reactions Unknown.

9.2.

SAFETY DATA SHEET						
according to Regulation (EC) No 1907/2006 (REACH) as amended						
Diethyl ether						
Creation date	24th April 2016	-				
Revision date	04th January 2024	Version	6.0			

10.4. Conditions to avoid

The product is stable and no degradation occurs under normal use. Protect against flames, sparks, overheating and against frost.

10.5. Incompatible materials

Protect against strong acids, bases and oxidizing agents.

10.6. Hazardous decomposition products

Not developed under normal uses. Dangerous outcomes such as carbon monoxide and carbon dioxide are formed at high temperature and in fire.

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Inhalation of solvent vapors above values exceeding exposure limits for working environment may result in acute inhalation poisoning, depending on the level of concentration and exposure time. No toxicological data is available for the substance.

Acute toxicity

Harmful if swallowed.

Diethyl ether						
Route of exposure	Parameter	Value	Exposure time	Species	Sex	
Dermal	LD50	>2000 mg/kg		Rabbit		
Oral	LD50	1211 mg/kg		Rat (Rattus norvegicus)		
Inhalation	LC50	31000 ppm	30 minutes	Mouse		

diethyl ether

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Hazard of environmental contamination; dispose of the waste in accordance with the local and/or national regulations. Proceed in accordance with valid regulations on waste disposal. Any unused product and contaminated packaging should be put in labelled containers for waste collection and submitted for disposal to a person authorised for waste removal (a specialized company) that is entitled for such activity. Do not empty unused product in drainage systems. The product must not be disposed of with municipal waste. Empty containers may be used at waste incinerators to produce energy or deposited in a dump with appropriate classification. Perfectly cleaned containers can be submitted for recycling.

Waste management legislation

Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008 on waste, as amended. Decision 2000/532/EC establishing a list of wastes, as amended.

SECTION 14: Transport information

SAFETY DATA SHEET

according to Regulation (EC) No 1907/2006 (REACH) as amended

	Die	thyl ether		
Creation date	24th April 2016	-		
Revision date	04th January 2024	Version	6.0	
IBC	International Cod Dangerous Chem		d Equipment of Ships Carrying	
IC50	Concentration cau	ising 50% blockade		
ICAO	International Civi	Aviation Organization		
IMDG	International Mar	time Dangerous Goods		
IMO	International Mar	time Organization		
INCI	International Non	nenclature of Cosmetic Ing	redients	
ISO	International Org	anization for Standardizati	on	
IUPAC	International Unio	on of Pure and Applied Che	emistry	
LC50	Lethal concentration of a substance in which it can be expected death of 50% of the population			
LD50	Lethal dose of a substance in which it can be expected death of 50% of the population			
log Kow	Octanol-water pa	tition coefficient		
OEL	Occupational Exp	osure Limits		
PBT	Persistent, Bioacc	umulative and Toxic		
ppm	Parts per million			
REACH	Registration, Eval	uation, Authorisation and	Restriction of Chemicals	
RID Agreement on the transport of dangerous goods by rail				
UN	Four-figure identi Model Regulations		stance or article taken from the UN	
UVCB	Substances of un biological materia		ition, complex reaction products or	
VOC	Volatile organic co	ompounds		
vPvB	Very Persistent a	nd very Bioaccumulative		
Acute Tox.	Acute toxicity			
Flam. Liq.	Flammable liquid			
STOT SE	Specific target or	gan toxicity - single exposi	ure	
Training guidelines	Training guidelines			

Inform the personnel about the recommended ways of use, mandatory protective equipment, first aid and prohibited ways of handling the product.

Recommended restrictions of use

not available

Information about data sources used to compile the Safety Data Sheet

REGULATION (EC) No. 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL (REACH) as amended. REGULATION (EC) No. 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL as amended. Data from the manufacturer of the substance / mixture, if available - information from registration dossiers.

The changes (which information has been added, deleted or modified)

The version 6.0 replaces the SDS version from 14 March 2023. Changes were made in sections 2, 11 and 16.

More information

Classification procedure - calculation method.

Statement

The safety data sheet provides information aimed at ensuring safety and health protection at work and environmental protection. The provided information corresponds to the current status of knowledge and experience and complies with valid legal regulations. The information should not be understood as guaranteeing the suitability and usability of the product for a particular application.
